ANNUAL REPORT.

YOUR Committee most respectfully presents to your notice, the usual Annual Report of its proceedings and expenditures during the past year. It is with great pleasure, that it is enabled to offer a favorable account of the prosperity of the Works; and the attention of Councils is called to the increase of the water rents during the year; the amount paid into the Treasury, in 1849, being over 6½ per cent. greater than the amount paid in, in the year previous, and this, notwithstanding some considerable reduction has been made in the rents of small dwellings.

Immediately after the passage of the ordinance of Councils, authorizing the laying down of a thirty inch iron main from Fairmount, contract was entered into, at favorable prices, with Messrs. Colwell & Co., and the necessary pipes and castings are now being made at the extensive Foundry of those gentlemen, at Conshohocken, on the Schuylkill river. It is hoped, that should the weather permit, the work of laying the main may be commenced on or about the first day of March next, so that a large portion of it may be made useful before the extreme hot weather commences.

In order that a very high portion of the City, viz., (Walnut street, from Schuylkill Fifth to Eighth street,) may have the full advantage of the large main, your Committee propose to lay a pipe of twelve inches diameter, in Schuylkill Fifth street, from Arch to Chestnut street, and the necessary sum is included in the estimate for next year's expenses. There is also a sum included for the purpose of laying a sixteen inch main on Cedar street, from Schuylkill Fifth to Eighth street; this main has been several times petitioned for, during the past year, both by the property owners upon the street, and by the authorities of the District of Moyamensing, and if it be laid, will complete the plan of distribution, on that border of the City.

It will be seen from the Accounts of Expenditure, that the purchase of the lots of ground, authorized by the ordinances of Councils, has been concluded. Your Committee does not propose doing any thing towards the construction of Reservoirs thereon, at the present; the object in making the purchase at this time, being merely to secure a favorable site, whilst an opportunity offered. It may not, however, be amiss to mention, that on several days together, in June last, over 7,000,000 of gallons of water were supplied to the City and lower Districts, per day, whilst the contents of all the present reservoirs, is but 22,031,976 gallons, or a little over three days supply; this is scarcely a sufficient surplus to admit of the subsidence of the earthy matter, sometimes contained in the water, after spring freshets, in the Schuylkill; from which fact, it will be seen that the time when it may be expedient to construct additional reservoirs is, perhaps, not very distant.

The consumption of water, during the year, was as follows :—

In the month of

January,	an average of	3,097,165	ale gallons per day.
“ February,	“ “	3,189,160	“ “
“ March,	“ “	3,495,810	“ “
“ April,	“ “	4,109,110	“ “
“ May,	“ “	4,661,080	“ “
“ June,	“ “	5,987,480	“ “
“ July,	“ “	5,597,040	“ “
“ August,	“ “	5,335,710	“ “
“ September,	“ “	3,315,735	“ “
“ October,	“ “	4,231,770	“ “
“ November,	“ “	4,323,765	“ “
“ December,	“ “	3,710,465	“ “

Being an average throughout the whole year of 4,421,190 ale gallons per day.

The above supply of water was distributed to 16,888 tenants, who pay for the water in the City, and about 3,500 families who receive a supply from public hydrant pumps.

Together, in the City,	20,388	tenants.
And by private hydrants in Southwark,	3,672	“
“ “ “ Moyamensing,	1,610	“

Together, 25,670 tenants.

It will be seen, that although the quantity of water used in the month of June was very large, yet for the remainder of the year, it was rather less, in proportion to the number

of tenants, than it was in 1848. This can only be accounted for by the fact that, during the most of the summer, the use of the wash pavement pipes, and the street sprinkling machines was, in a great measure, discontinued. In addition to which, the manner of cleansing the streets and gutters was much improved after the month of June, by the use of hose for that purpose, whereby the work was much more effectually done with a smaller quantity of water, and your Committee would earnestly recommend the same method to be pursued in future years.

The iron pipes laid during the year, amount to 11,342 feet, which makes the total amount of pipes, now laid in the City, a little over $77\frac{1}{8}$ miles.

The pipes now laid in the District of Southwark, is $14\frac{1}{2}$ miles, and in Moyamensing, $8\frac{1}{2}$ miles; which makes the total length of iron pipes in the City and lower Districts, $100\frac{1}{8}$ miles.

There are in the City, 632 fire plugs; in Southwark, 158; and in Moyamensing, 94.—Together, 884 fire plugs.

There are also in the City, 321 hydrant pumps.

The Amounts placed to the Credit of the Watering Committee, for the year 1849, were as follows:—

<i>Month.</i>	<i>Year.</i>	
		Benjamin Franklin was the first person known to have urged the necessity of a supply of water in Philadelphia. In
Jan'y 31,	1797,	The first petitions were handed to Councils, asking for the introduction of pure water into the city.
	1798,	Councils offered £50,000 pounds, for one-half of the water of the Delaware and Schuylkill Canal, which offer was rejected by the Canal Company.
July,	1798,	H. B. Latrobe surveyed Spring Mill Creek, with a view of bringing its waters into the city in an aqueduct twelve miles long—and made a report thereon to Councils.
January,	1799,	Mr. Latrobe's plan for the Centre Square and Schuylkill Chesnut St. works was adopted. On
May 2,	1799,	These works were commenced—and
Jan'y 21,	1801,	The first water was supplied from them.
	1810,	They become inadequate to the wants of the city.
Oct. 24,	1811,	Councils directed the Watering Committee to enquire for a better method of supplying the city; with this object they again turned their attention to the Delaware and Schuylkill Canal plan, but again rejected it.
Dec. 18,	1811,	Frederick Graff and John Davis made surveys of Wissahickon and Spring Mill Creeks, and of the Schuylkill river generally, and reported in favor of steam works at Fairmount; which report was adopted, and
Aug. 1,	1812,	The steam works at Fairmount were commenced.
Sept. 7,	1815,	They first commenced supplying the city—when the use of the Centre Square works was discontinued.
April 8,	1819,	Councils resolved to erect water power works at Fairmount.
April 19,	1819,	The building of the dam was commenced, and on
July 25,	1821,	The water first flowed over it.
April 28,	1821,	The corner stone of the present mill buildings was laid.
July 1,	1822,	The first wheel and pump was started to work to supply the city.
Oct. 25,	1822,	The use of the steam works at Fairmount was discontinued.
	1829,	The buildings at Centre Square were taken down.
April 2,	1842,	The re-building of the dam from low tide upward was commenced, and
Dec. 6,	1843,	It was finished.
